case: Meridian

date: 2026-11-04

07 — Executive Deck

UC-07/10 — ECGT Compliance Gap Detector

S1 — Context

Meridian at a glance

Meridian operates 1,400 stores across 22 countries.
Revenue USD 8.2B. Digital channel 31%, growing 18% YoY.
Directive (EU) 2024/825 in application since 27 September 2026.

Word count: 25

Speaker note:
ECGT is already live — this deck is about acting now versus waiting for enforcement.

S2 — Problem

What catalogue managers face today

Catalogue managers cannot identify which SKUs are missing or inconsistent ECGT claims across web, app, and in-store — and cannot manually review the full catalogue.

Word count: 24

Speaker note:
We have no tool to find compliance gaps at scale; manual review of 22 markets is not feasible.

S3 — Opportunity

The gap we can close

A classifier that detects ECGT compliance gaps across 22 markets, prioritised by revenue, before enforcement actions accumulate.

Word count: 17

Speaker note:
One classifier, 22 markets, highest-revenue gaps first — targeted, not a platform rebuild.

S4 — Solution

How it works

Multi-label classifier scans the catalogue, flags missing or inconsistent durability, reparability, and environmental claims, and surfaces a revenue-prioritised remediation queue.

Word count: 20

Speaker note:
The classifier finds and ranks gaps; managers action them; human sign-off stays in the loop.

S5 — Value

What success looks like

Reduces live non-compliant SKUs by ~56% if A2 (70% detectable) and A3 (80% actioned) hold. Magnitude confirmed by catalogue audit. Assumption, not sourced.

Word count: 23

Speaker note:
56% is 70% detectable times 80% actioned — the catalogue audit turns this assumption into a real number.

S6 — ROI

The numbers

Base: ~+USD 1.24M Year 1 net (ramp-adjusted: value from month 7 per S9, assumption). Pessimistic: no payback. Payback roughly within Year 1 (assumption). Build cost USD 350K–1,200K. All figures UNVERIFIED.

Word count: 30

Speaker note:
Base net is ~+USD 1.24M after ramp; if enforcement never happens, it never pays back.

S7 — Risks

The binding gate

Binding gate: legal opinion on ECGT enforcement scale. Without it, V1 and V4 are zero and the use case never pays back.

Word count: 22

Speaker note:
Every other risk is manageable; this one is binary — enforcement happens or it doesn't.

S8 — Ask

What we need to proceed

~USD 50K discovery budget (assumption, unverified — vendor quotes needed): catalogue data audit (A1), data

readiness assessment (A2), EU regulatory counsel opinion (V1).

Word count: 22

Speaker note:
USD 50K is an assumption from three components; we are asking to get quotes, not to build.

S9 — Timeline

Indicative schedule

Month 1–2: catalogue audit and legal opinion. Month 3: data readiness assessment. Month 4–6: build. Month 7: first output to catalogue managers. Assumption, not scheduled.

Word count: 25

Speaker note:
Discovery stops at month 2 if the legal opinion shows low risk; the build timeline needs vendor quotes.

S10 — Next Steps

Three actions this week

Commission legal opinion. Initiate catalogue audit. Assign catalogue data owner. No build commitment until all three UNVERIFIED flags are resolved.

Word count: 20

Speaker note:
Three actions this week: legal opinion, catalogue audit, name a data owner — no build commitment yet.

Deck provenance note

Sourced figures in this deck:

- ECGT application date 27 September 2026 (B6/B7, EUR-Lex, confirmed by human check)
- Meridian revenue USD 8.2B, digital share 31%, growth 18% YoY (case definition, modules/001-reference-cases.md)

All other figures are UNVERIFIED assumptions, including:

- ~+USD 1.24M Year 1 net (S6) — ramp-adjusted assumption; 06-roi.md retains unadjusted +USD 3.3M figure
- ~USD 50K discovery budget (S8) — assumption; three-component derivation: counsel ~USD 15–20K, audit ~USD 15–20K, data readiness ~USD 10–15K; vendor quotes needed
- USD 350K–1,200K build cost (S6) — UNVERIFIED
- ~56% SKU clearance rate (S5) — assumption arithmetic
- All ROI figures — see 06-roi.md for full flag table

No figure should be presented externally without completing the discovery actions on S10 and obtaining the legal opinion named on S7.
